- + **The degree can be completed in just 12 months** if two courses are taken during the Fall and Spring semesters and one during the Summer. Alternatively, students can complete courses to accommodate busy work schedules.

M.S. in Professional Science: Sustainability Science

Combining science with organizational and communication skills, the Unity College M.S. in Professional Science will give you the skills and credentials you need to advance in your career path.

Sustainability science is a problem-based, solution-oriented framework for creating a resilient civilization. The framework combines technical sustainability with skills based in the social sciences and humanities to create effective change agents who can work within the context of political, economic, and cultural concerns. Mitigation and adaptation to climate change is emphasized along with biodiversity conservation, resource conservation, and mitigation of pollution. Students within this track should expect to explore, debate, and research possible solutions to climate change from a variety of viewpoints.

Who is this program designed for?

The M.S. in Professional Science: Sustainability Science is aimed at new graduates, career changers, and those interested in pursuing sustainability roles within their current organizations. It is a great choice for graduate students who have a degree but want to complement their current skill set with training in business, management, and communications, as well as professionals who already have a job in the environmental field or at a business and want more experience in the tenets of sustainability. Government workers who want more experience and knowledge about sustainability, and current sustainability coordinators seeking to upgrade their skills en route to a promotion, will also find this degree instrumental.
