Environmental Science and Climate Change  
Bachelor’s Degree (2019-2020)

The B.S. in Environmental Science and Climate Change degree enables students to work effectively as environmental inspectors, consultants, engineers, or urban/regional planners. Learning through the lens of climate change adaptation and mitigation, this program also prepares students with a sound understanding of modern environmental issues and the professional skills needed for effective functioning in modern natural resource organizations.

Graduates of the B.S. in Environmental Science and Climate Change will be able to:

1. Assess the political, legal, economic, and social dynamics associated with environment issues and the management of environmental issues.
2. Demonstrate a rigorous cross-disciplinary science base (biological, physical, and social sciences) with a deep knowledge to analyze and interpret data.
3. Explain pressing environmental issues through the lens of climate change and apply scientific and management solutions.
4. Exhibit ability to choose and implement appropriate laboratory techniques used in environmental analysis.
5. Demonstrate proficiency in written, oral, and interpersonal communication.
